WIN!: Access to Patient Information through IHIN Clinical Portal

Who: Medicap Pharmacist & Patient

When: Week of March 21, 2016

Where: Medicap Pharmacy

Why: To obtain patient medical history information to provide a Medicare Part D Comprehensive Medication Review

What: This was a very complete document with 6 pages of very helpful info such as medication list (we were not filling all meds and unaware of a few meds), active problems/conditions (including an upcoming surgery which will help us transition care post-discharge), recent vitals and labs, immunization history and upcoming appointments.

Benefits: This information was extremely helpful in making good clinical decisions/recommendations for this patient. There were meds and conditions we were unaware of that changed some of our recommendations. It will also help us transition care for this patient.
